## Doesn't it make sense

in the complicated world of medical malpractice and personal injury to add a knowledgeable insider to your legal team?

Doesn't it make sense to have work with a nurse who can write Life Care Plans because she has years of experience coordinating and organizing care for patients?

Doesn't it make sense to hire a consultant who can determine the costs of care and equipment because she had to negotiate and authorize pricing? Someone, who researched and facilitated services to provide patients with the necessary means for a safe environment.

Doesn't it make sense to hire a consultant who knows what questions to ask? Who can translate the jargon, terminology, and records that make so many cases a maddening muddle. Someone, who is an expert at researching policies and procedures because she used to write them.

Doesn't it make sense to have a liaison between the legal community and the healthcare world? Someone who can locate expert witnesses, prepare interrogatories and assist at depositions. A nurse, who is an aggressive sleuth who can find where the answers are buried.

If you agree, then let the expertise of Blue Beacon Medical save you time and money!

## Blue Beacon Medical

Specializes in

- Life Care Plans
